Farm 365

Animal Husbandry Software

# The Complete Solution to Your Cattle Management Needs

**Works on Offline Mode also:** App works without availability of Internet and once the Internet is available, all data will be sync with Central Server

Animal Husbandry Software is a technologically advanced solution developed by Prompt Equipments to increase the milk production and efficiently manage the cattle by guiding the dairy farmers. With this system, they can improve cattle feeding, cattle breeding and manage their farm scientifically, resulting in increased yield & hence their profitability.

Maintain animal breeding, feeding, and lactation records accurately

Historical data helps to monitor and improve milk productivity in cattle

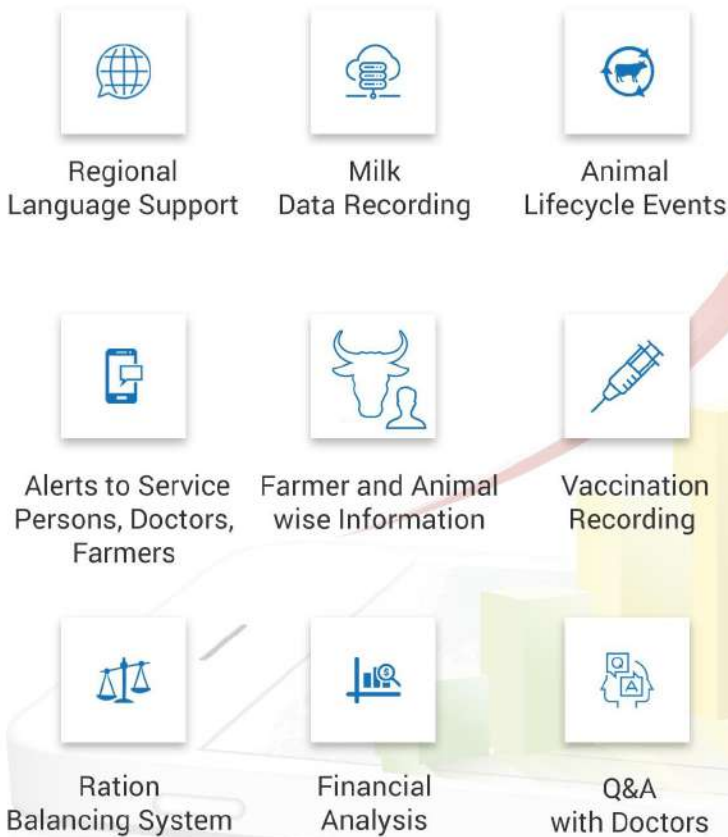

Manage records of AI, PD, Medical Health Checkup and Calving of cattle

Send alert to the farmers for the cattle cycle events and educational programs

## Features

## Benefits

### 1 Animal Wise Milk Recording

Individual lactation-wise milk production is recorded into the system for each animal. Milk recording is based on every 10 days or daily.

### 2 Financial Analysis

Income/Expense Report lets you know animal wise profitability. Negative Animal Detection is done by the system which can be reported to doctor for immediate remedy thus minimizing losses.

### 3 Ration Balancing Program

The system formulates least cost rations using locally available resources, recorded information and requirement of each animal.

### 4 Alerts on your Fingertips

Alerts on individual animal's lifecycle event like Heat, PD check, Drying up, Calving, Vaccination etc. are sent to farmers via SMS.

**Mobile Apps.**  
Farmers App.  
Milk Union App.  
VDCS App.  
Mobile Order App.
