SmartTec
Market Synergy System

With an elaborately architected 'SmartTec' software system at your head-office and the most easy to operate hardware device 'Retail Databox' stationed at all your outlets...this is how it works :

How it works :

Bring synergy to your market

SmartTec Synergy System is designed to provide complete control over the purchase & sale of all products / items. It will automate all transactions between Head-Office and all outlets. Empowers you to access all the data of all the outlets in real time. Data like daily sales, purchase, stock, cash and credit. Auto notification informs about stock depletion, allowing you to maintain cost-effective supply chain with outlets. Your outlets can also manage inward & outward of stock, submit order for required items and facilitate various reports from Retail Databox (DB).

You can apply item-wise price changes & bring it in immediate effect at all or select outlets, any time. You can device product schemes or customer-wise loyalty programs and manage it centrally. Studying the market trends - sales rates, time wise product preferences of customers etc - help you focus on strengths and increase the sales.

Bring all your retail outlet transactions
...under your command & control !

Smart automation for all kind of RETAIL franchise

Databox is a Real Boon for Retailers

Databox (DB) allows retailers / outlet operators the privilege of automating the arduous task of manual system. DB works as their first computer, saves on investment and space. With a small training session and some in-person guidance during early days usage, they can pick-up the handling fast. Once they pass the retail handover stage, they can run do without SmartTec Databox assistance. Because DB can make their work independently easy by saving tonnes of a lot of paper-work, time and energy.

Just by keeping transactions on DB, regularly, retailers can simultaneously maintain income & payment accounts, item-wise stock records and can submit reports directly to HQ. They don't have to bother about item-wise prices, applicable schemes and sudden depletion of stock. Databox is updated remotely by HQ. Also reminds them by alerts and notifications. Auto or customer-wise category prices can be applied. Receipts, monetary transactions clear, thus saving them any monetary loss. In short SmartTec Databox is pocket of mine for them.

SmartTec
Retail Databox The winning features:

- Databox (DB) is very compact, rugged and portable. Replaces the need of big budget, big space consuming computer.
- DB uses GSM mobile service, so no internet cable or Wi-Fi is required to communicate with web server.
- Inbuilt battery provided, so it can work in power cuts.
- USB ports allow connecting keyboard, barcode scanner, pen-drive etc. A thermal printer for away billing.
- Easy to add new DB (new outlet) to existing chain and using multiple DBs on larger single outlet.

Smart Choice of New Age Managers !

SmarTec

Market Synergy System with
Retail DataBox

Synergy System. Software Features (HO)

Manage User	User role & users with different rights can be created.
Organizations	Web application will maintain hierarchy Manufacturing Plant > Branch (Head office) > Outlet (Shop)
Item / Product	Web App. will maintain Product Master data (Item Groups, Items, Item Pricing etc.)
Outlet Customer	System App can create & track all customers of each outlet, maintain transactions & customer ledger. Customer schemes can be supported.
Purchase Order Verify & Dispatch	Administrator at HO can verify the PO from outlet, can alter the order quantity and then dispatch.
Reports	Multiple reports can be generated from the data, which will support HO's plans / projections and achieve complete synergy amongst all the outlets in market.

* Note : Ask for the detailed technical features & functions report

DataBox Technical Specification (Retail Outlet)

CPU	300Mhz AM1808 Microprocessor
DDR / Flash Memory	128 MB / 256 MB
Display	3.5" TFT (320 x 240) with back light
Data Storage Media	Micro SD
Data Capacity	4 GB (in-built) - expandable up to 32 GB
Keypad	USB PC Keyboard
Battery	2200mAh Li-ion Battery
Printer	48mm Thermal Printer
Oprtg. System/Database..	Linux / SQLite 3
Dimension (L x W x H)..	22 x 20 x 11.5 (cm)
2G Module	GPRS 900/1800MHz, Built-in 1 SIM Card Slot

* Retail DataBox connectivities :

Antenna for GSM connectivity, to send/receive data

Digital Weighing scales can be attached to capture itemwise weight

BarCode Scanner through USB for reading coded info

USB also allows capturing data from any digital storage device
