The pursuit of purity

**THINK
DAIRY TECH**

**THINK
PROMPT**

WHO ARE WE?

Prompt is a pioneer in providing cutting-edge dairy tech solutions.

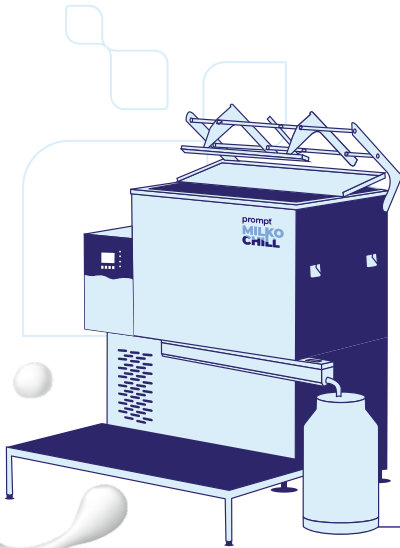

From farm management and milk collection to quality analysis and preservation, Prompt's innovative solutions ensure that milk's purity is retained at every step. Also, our cloud and IoT-based solutions have made milk procurement more transparent and traceable in real-time, thereby enhancing the dairies' efficiency and effectiveness and securing appropriate earnings for the farmers.

WHAT DRIVES US?

The passion for keeping milk at its natural best drives all our innovations. We call this relentless effort **"The Pursuit of Purity."**

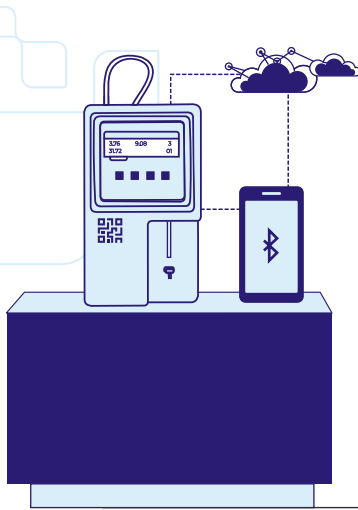

INNOVATIONS

Prompt MilkoChill

INSTANT MILK CHILLING FOR BETTER SHELF LIFE AND PROFITABILITY

Prompt MilkoChill is an innovative instant milk chiller with patented technology that brings the benefit of instant milk chilling at the doorstep of the farmer. It can chill up to 250 litres of milk in an hour. The system ensures instant milk chilling even under erratic power supply, and can operate with solar power. MilkoChill preserves the purity of milk, reduces spoilage by arresting bacterial growth at the source, and consequently increases the shelf life of milk.

Prompt iSmart Milk Analyzer

INNOVATIVE AND INTELLIGENT MILK ANALYZER WITH CLOUD CALIBRATION

Prompt iSmart Milk Analyzer is the first smart milk analyzer in the Indian market which offers secured cloud calibration assisted through Bluetooth enabled mobile app, thus making calibration free from manual intervention. All the historical data logs such as Fat, SNF, self-cleaning data, calibration data, etc. are maintained online on the cloud which can be accessed real-time. It thus ensures transparency and optimum earnings to the dairy and the farmer.

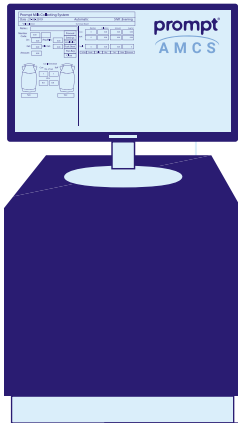

Prompt MilkoCheck

UNIQUE AND EFFICIENT COMPARED TO MILK CONTROL SAMPLES

Prompt MilkoCheck is a combination of specialized liquid that mimics the properties of raw milk. The system comprises 4 bottles of liquid, along with a secured mobile application. Through Prompt MilkoCheck, dairies from a central location can check the calibration status of Milk Analyzers installed at various locations. It removes the bottleneck of managing milk samples of different ranges of FAT/SNF and helps eliminate the practical problems of using raw milk samples for calibration.

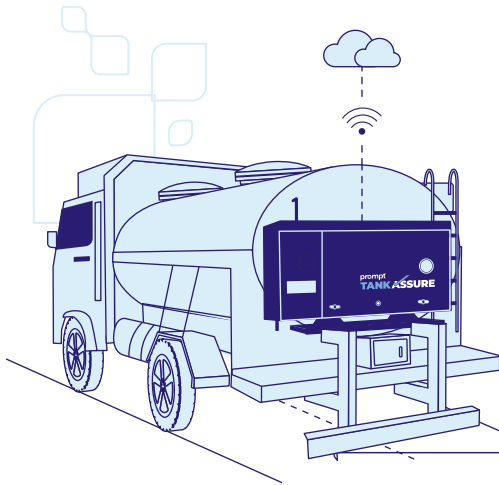

THAT ARE CHANGING THE DAIRY LANDSCAPE

Prompt Automatic Milk Collection System (AMCS)

ENSURING TRANSPARENT AND FAIR PAYMENTS TO FARMERS

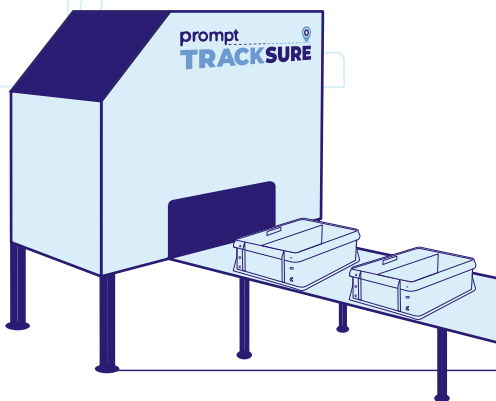

Prompt Automatic Milk Collection System digitalizes the entire milk collection process. It gives real-time updates and stores data on cloud for easy access and ready insights. Computer/Data processor/Mobile-app based AMCS solutions enable transparency between dairy, milk collection societies and farmers.

Prompt TankAssure

ENSURES TRANSPARENCY, PROFITABILITY AND EFFECTIVENESS OF THE MILK COLLECTION SYSTEM

Prompt TankAssure is an intelligent and digitally secured closed and containerized system mounted behind a milk tanker with RFID tagged tamper-proof sample vials. It automatically collects milk samples, records milk quantity and milk temperature through an in-built temperature sensor. This data is also recorded on the web portal.

Prompt TrackSure

WORLD'S FIRST AI-POWERED, PATENTED AND COST-EFFECTIVE CRATE MANAGEMENT SYSTEM

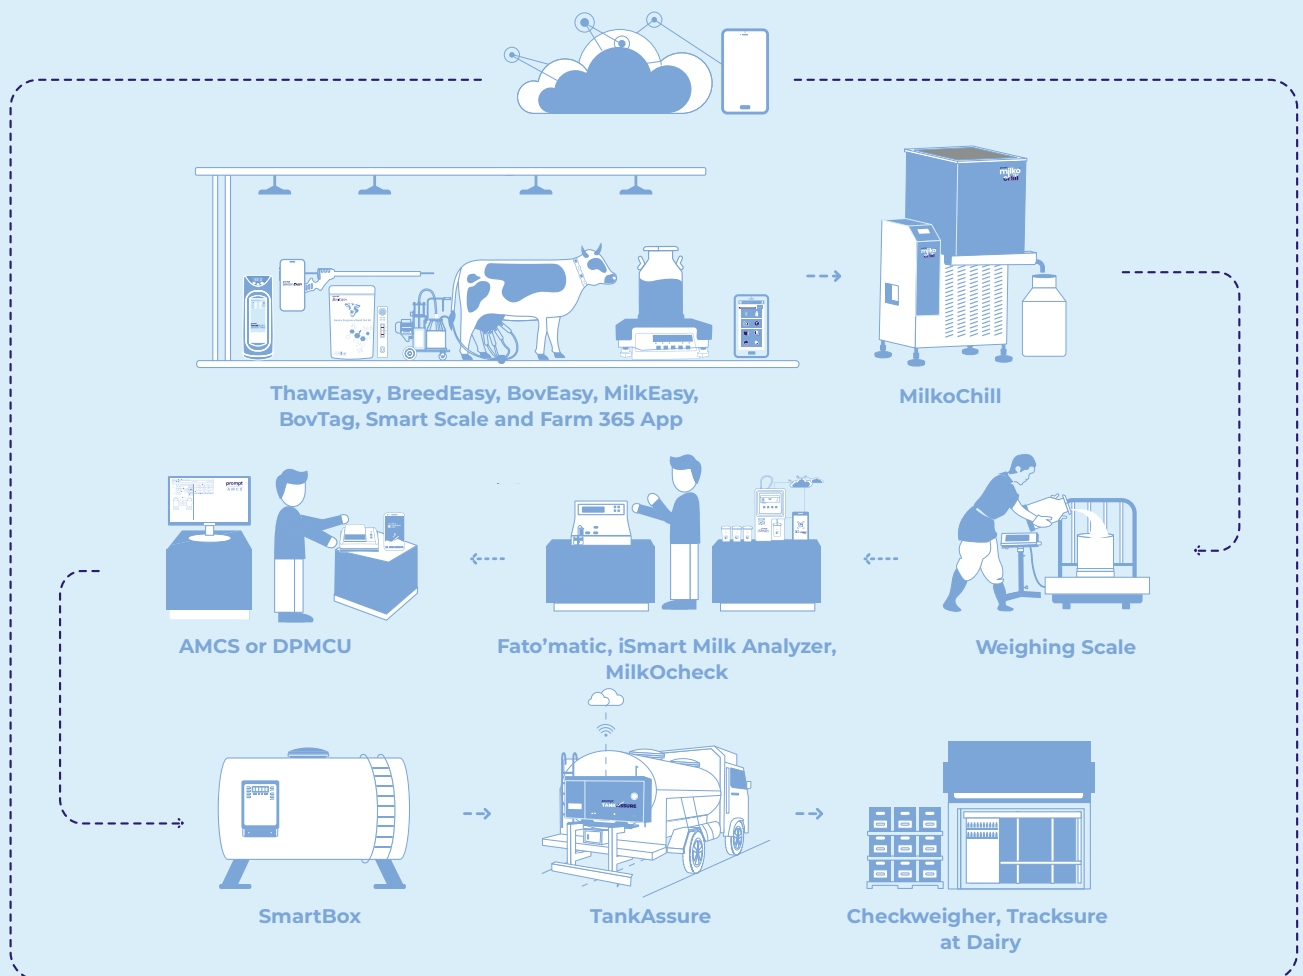

Introducing a groundbreaking solution revolutionizing crate management. As the world's first AI-powered system, Prompt TrackSure combines innovation & efficiency to optimize crate utilization. Its patented technology offers unparalleled insights, allowing businesses to streamline operations while minimizing costs.

WHAT MAKES US UNIQUE?

We are an indigenous brand offering completely Made in India technological solutions and several patented products. The might of our

reach can be estimated from the fact that more than 4.5 million farmers pour milk through our systems and applications on a daily basis.

OUR INNOVATIVE SOLUTIONS ACROSS FARM LEVEL, COLLECTION CENTRE LEVEL AND DAIRY LEVEL

WHY PROMPT?

28 +
states

900+
team members

350+
districts

68,000+
villages

Legacy of over
3 decades

10 patented
products

220+ serviceable
locations
