INTRODUCING

prompt
TRACKSURE

end-to-end carton box management solution

Leveraging revolutionary Computer Vision Technology to enable real-time tracing of carton boxes

INTRODUCING **prompt TRACKSURE**
end-to-end carton box management solution

Meet these challenges in carton box traceability easily

- Getting accurate traceability data in industries with high production speeds
- Integrating traceability system with existing production systems
- Apprehensions about barcode or RFID readability
- Losses from theft, pilferage or improper packing

Why Prompt TrackSure is a Pro in improving supply chain efficiencies?

- Improved accuracy
- Reduced labour costs
- Increased efficiency
- Better management
- Enhanced traceability
- Easy integration with existing CRM / IT systems
- Useful data insights for better decision making

Prompt TrackSure, at a glance

Tracking flow of packed products in CFC boxes, from manufacturing plant to distribution centers

ACCURATE & INTELLIGENT: A Real-time Track & Trace System Powered by AI technology

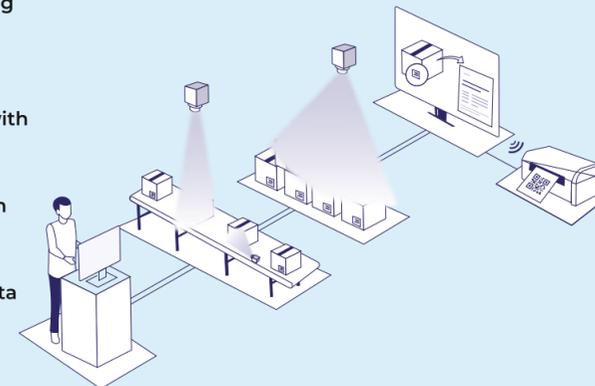

- Automates the entire process of reading product information and generating and printing QR code
- Reduces overheads significantly
- Avoids pilferage and other losses

PACKAGING SECTION

Providing real-time update of stock transferred

- Extracting the following information using Industrial cameras that are fixed on packing conveyor for capturing the images of each box having primary packs.
- SKU-wise count for the box
- SKU-wise weighing records and rejecting with alarms if needed
- Timestamp
- Reading the product information printed on boxes for variant name, SKU details, SAP Code etc.
- Mapping the product along with weight data and giving input to online QR printer for printing along with pre-filled information such as manufacturing date, expiry date and batch no.

QR CODE

Unique 8-digit alphanumeric no. with 1 digit fixed
QR code would contain:

- Unique ID
- Batch no
- Date of manufacturing
- Date of expiry
- SKU Name
- Weight information

- Printing QR on CFC boxes
- Reading the QR before entering into warehouse
- Alert will be generated for any deviation in count between production and warehouse scanning

STORAGE SECTION

Getting real-time update of stock count and carton transfer details

- Initiating session from desktop application
- Capturing QR for each carton on conveyor, at the entrance of storage
- Difference in count, if any will be notified through alert mechanism
- Checking result on Web Portal and Mobile app using credentials

DISPATCH SECTION

Giving real-time updates of stock count and carton uploading details

- Initiating process with TrackSure app
- Authenticating driver's detail, using OTP
- Scanning of QR code using industrial camera or QR reader while loading the vehicle
- Mapping delivery challan- SKU wise
- Generating verification report- SKU wise
- Stop capturing of data and submitting information to server
- Check results on Web Portal and Mobile app or in scan history
